## D8

2-way Passive  
Installation System

The CODA D8 is a 2-way coaxial loudspeaker system designed without compromise to provide a true one point source in an ultra compact package.

The cabinet contains a high power 8" woofer and a coaxially mounted neodymium driver with 44.4 mm voice coil.

The advanced design aligns the acoustical centres of the transducers to produce a single point source. This unique loudspeaker technology provides a coherent wave front without hot spots. Precise directivity of 90° conical ensures uniform coverage with perfect time alignment between the components.

Supported with a full range of mounting and flying accessories the D8 sets a state of the art solution for almost any high quality, near field installed sound reinforcement applications.
